Contents

1   Introduction

Although no customization changes are required in ACP Release 5.6 for the Financial Instruments area, you may decide to change your customization now instead of waiting until you upgrade to ACP Release 5.7.

These customization changes are associated with changes that will be made to the **Asset Evaluation Engine** in ACP Release 5.7. If you want to make these changes now, you can use a base parameter to enable the 5.7 behaviour in ACP Release 5.2 and later. For full details, see the *Financial Instruments – Customization Upgrade Guide (doc. ID: 4369)* for ACP Release 5.7.
